Cantilever Racking Systems

...FOR QUALITY, EFFICIENCY AND SAFETY

We specialise in the design, manufacture and installation of high quality Cantilever Racking Systems.

- High quality fabrication from hot rolled steel sections
- Arm connection can be either bolted, or easily adjustable Quickloc
- Maximise storage capacity, accessibility and presentation of long or irregular items
- Available for internal or external use

Cantilever Racking

Every organisation, large or small, is constantly looking for ways to gain an edge or advantage over the competition - reducing costs, increasing capacity and improving efficiency.

We can help you to achieve these goals and much more, with our Cantilever Racking systems. Experience and knowledge of the industry is essential, taking into account all relevant conditions and factors to ensure the optimum installation.

CAPACITY is maximised by allowing product storage heights of up to 10m and variable arm lengths

STOCK is immediately accessible - reducing handling, easing stock rotation and improving turnaround

CONTROL is maximised by reducing wastage and improving presentation to customers and staff for stocktaking

EFFICIENCY is increased throughout the organisation, costs are reduced and productivity increased

Canopies

We can also supply canopies to protect your externally stored products, designed to suit your particular requirements.

Versatility and Flexibility

An important feature of our Cantilever Racking systems is versatility and flexibility:

- Heights up to 10m and unlimited rack lengths
- Arm lengths 0.5m to 2.5m with variable carrying capacities
- Cantilever frame uprights either single or double sided
- Columns are punched to both sides to allow future conversion
- Replacement of damaged components is simple and inexpensive

Perfect for storing timber, sheet material, plastic pipe, sections, plate, flats, tube, rounds, coils and many other applications.

We have considerable experience in producing racking systems for Storage, Wholesale, Manufacturing and Retail usage.
